FOUNDER THESIS · HEALTHCARE · UAE & GCC

Patients don't book clinics. *They book doctors they trust.*

A medical agency built by medical professionals to help clinics and doctors in the UAE and GCC win, convert and keep patients across the entire patient journey, with plans to extend to other parts of the world.

"Content gets a clinic the opportunity.
Its systems decide what happens next."

Dr. Azka

Founder · Medical Agency · Dubai, UAE

PREPARED FOR
FOUNDERS CLUB INTERNATIONAL
NOVEMBER 2026

EXECUTIVE SUMMARY

We are not a marketing agency. *We are medical professionals.*

Dubai's healthcare sector is growing fast. More facilities and more licensed professionals mean more clinics competing for the same patients. Most of the investment goes into being *seen*. Very little goes into what happens after a patient sends the first message.

I am a medical doctor and the founder of a **medical agency for private clinics and doctors in the UAE and Saudi Arabia**, with plans to extend across the GCC and to other parts of the world. We work with **dermatologists, aesthetic physicians and cosmetic dentists**. Our team is made up of **doctors, medical professionals and medical students**, supported by our own **software and AI engineers**. We understand patients because we are trained to care for them. That changes how a clinic is branded, how it speaks to patients and how it keeps them.

Status: The agency is in the process of registration in the UAE, completing by the end of November 2026.

01

Clinics built around specialists

We build each clinic's brand around its specialists, so patients choose the clinic because of the doctors inside it.

02

Doctor personal branding

Positioning and content for the doctors patients actually book, written by people who understand clinical communication.

03

Automated patient journeys

Systems that turn every enquiry into a booked, attending and returning patient, around the clock.

> *In healthcare, growth depends on trust, and trust is built by doctors. The clinics that win the next phase of Dubai's growth will be the ones that answer, reassure, book and follow up with patients best.*

What I'm seeking from Founders Club International

My main objectives are **scalability and placement**: positioning across the UAE, Saudi Arabia and the wider region, introductions to clinic owners, healthcare groups and decision-makers, and strategic guidance on growing the agency. I am also **open to investment** where it accelerates one clear opportunity: an **International Patient Desk** serving Gap 03 (medical tourism) from FCI's own Dubai healthcare analysis.

THE MARKET SIGNAL

Dubai healthcare is growing. *So is the competition for every patient.*

DHA figures for H1 2026, compared with H1 2025:

5,931
+7%
Licensed health facilities, roughly 390 more than a year earlier

70,566
+6.5%
Licensed health professionals, about two-thirds of them women

1,903
+9.9%
Medical complexes and optical centres

249
+22.7%
Home healthcare facilities, the fastest-growing category

5,378
+36.3%
DHA inspection and monitoring visits

Dermatology
Among DHA's fastest-growing specialties, alongside OB/GYN and paediatrics, and at the core of our focus

Source: Dubai Health Authority, H1 2026 data, as compiled in the healthcare analysis shared by Founders Club International.

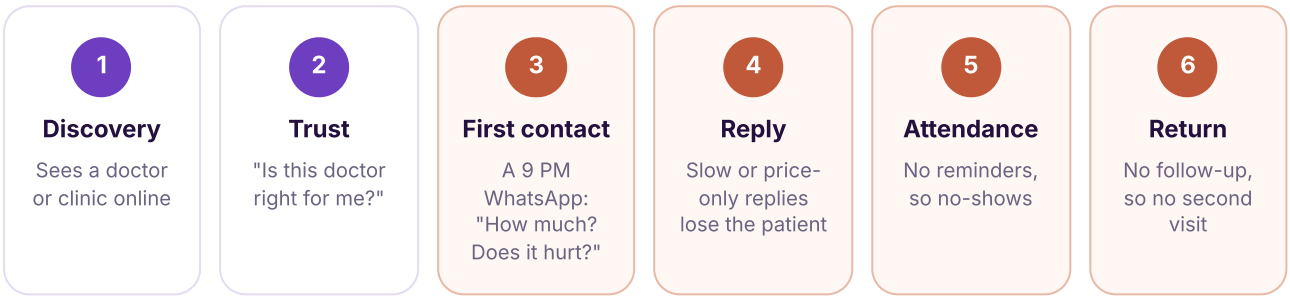

What this means for a clinic owner

SIGNAL	THE CONSEQUENCE
More supply, same patients	Hundreds of new facilities competing for the same online attention. A patient comparing three dermatology clinics picks the one that replies first and reassures best.
More scrutiny	Inspections rose by more than a third. Patient communication and marketing must be compliant as well as effective, which a medical team is trained for.
Doctors without visibility	Over 70,000 licensed professionals, yet most doctors have no personal brand, even though they are the reason patients book.

THE GAP

The private clinic's front door *is where patients are lost.*

FCI's analysis identifies five open gaps in Dubai healthcare. Each sits inside care delivery or payment. Before all of them is a gap almost no one is building into: the journey between a patient discovering a doctor and walking into the appointment.

● Patient leaks: points where the clinic has already paid for attention and then loses the patient.

Why the gap is still open

WHO SERVES CLINICS TODAY	WHAT'S MISSING
Marketing & content agencies	**No medical understanding.** Generic content, compliance risk, nothing after the post.
Personal-brand coaches	**No systems.** No replies, bookings or follow-up.
CRM & booking software	**No strategy or voice.** Tools without the human patient experience.
Front-desk teams	**No after-hours cover.** No scripts, no measurement.

> *Nobody is accountable for whether the patient actually books, attends and returns. We are building the one partner who is, with medical professionals leading every account.*

THE MODEL

One medical partner *for the entire patient journey.*

BRAND

Building clinics around specialists

There are two types of branding in healthcare, and every clinic owner or private-practice doctor needs both:

- **Clinic branding** built around its specialists, so the doctors become the reason patients choose the clinic.
- **Personal branding** for each doctor: positioning, content strategy and scripts.

Written by medical professionals, so it's medically accurate and aligned with UAE health-advertising rules.

SYSTEMS

Automated patient journeys

Built in-house by our software and AI engineers:

- Instant, on-brand replies on WhatsApp, Instagram and web, 24/7
- Answers to price and "doubt" questions, using the doctor's own short videos
- Booking, confirmations and reminders that reduce no-shows
- Follow-up and reactivation of past patients
- A clear dashboard: enquiries, reply time, bookings, return rate

How a clinic starts: Patient-Leak Audit → 60-day pilot

We test the clinic exactly as a patient would: a 9 PM message, a price question, a missed call. Then we deliver a short report showing where patients are lost. That leads to a **60-day pilot** with agreed metrics (reply time, booking rate, no-shows, reactivation) and then an ongoing partnership.

Safety by design

Our systems handle enquiries, logistics and doctor-approved information only. They never diagnose or give medical advice, and anything clinical goes straight to the clinic's licensed staff. Patient data is handled in line with UAE data-protection and DHA requirements.

THE GROWTH OPPORTUNITY · GAP 03 · MEDICAL TOURISM

The International Patient Desk

FCI's analysis identifies medical tourism as an open gap: international patients need help with specialist discovery, appointment coordination, travel planning and aftercare. Medical tourism in the UAE keeps growing, and aesthetic and cosmetic dental care are among the reasons people travel. It's the same front door we already fix for local patients, so it's our natural next step: helping clinics serve these patients exceptionally well.

What the desk does for clinics

1. **Enquiry** — Answered in the patient's language and time zone
2. **Medical review** — Our medical team reviews reports and needs
3. **Specialist match** — The right specialist and verified clinic
4. **Coordination** — Appointments, travel timing, pre-visit prep
5. **Aftercare** — Structured follow-up once the patient is home

Why we can win it

- **Medical professionals at the front.** International patients send reports and clinical questions before they travel. A medical team can read them and route correctly; a travel or marketing agency can't.
- **Non-clinical by design.** We coordinate and the licensed clinic treats, so patient safety stays with the clinician.
- **Built on what we already run.** Same systems, same team.

How we'll start (FCI's playbook)

- **One focused starting point:** a single patient market and treatment category within dermatology, aesthetic medicine or cosmetic dentistry
- **Licensed clinic partners** in Dubai, with the right facilitator licensing confirmed with DHA
- **Measured outcomes:** enquiry-to-booking rate, satisfaction, aftercare completion

Where investment would go

The core agency grows on client revenue. The International Patient Desk needs a dedicated product, and this is where investment would accelerate us:

- Additional developers to build a multilingual patient portal with secure report upload
- A specialist-matching and coordination engine connected to partner clinics
- A focused pilot with dedicated medical coordinators

AGAINST FCI'S FOUNDER PLAYBOOK

A verified need, *and a compliant solution.*

PLAYBOOK STEP	HOW WE MEET IT
01 · Pick one problem	One user: the private clinic owner. One pain: patients lost between first contact and the appointment. For now we work only with **dermatologists, aesthetic physicians and cosmetic dentists**. Dermatology is among DHA's fastest-growing specialties.
02 · Validate demand	Early conversations with clinic owners outside the UAE confirmed the same leaks. Our first UAE milestone is validating this in Dubai through Patient-Leak Audits with measured reply times.
03 · Check the rules	A non-clinical service: no diagnosis, no treatment. All content is reviewed by medical professionals and aligned with DHA and UAE health-advertising rules.
04 · Assess the sandbox	Not required for the current service. If a future product uses health data, Sandbox Dubai is the route.
05 · Pilot, measure, scale	A 60-day pilot per clinic with before-and-after metrics, then clinic groups, then the International Patient Desk.

WHY THIS FOUNDER

A doctor who chose to build

I graduated recently, at 24. Instead of a purely clinical path, I chose to build what clinics and doctors are missing. I understand medicine from the inside, I grew up digital, and I'm building for the next twenty years of healthcare, not the last twenty.

WHY THIS TEAM

Medical minds, engineering hands

- Doctors, medical professionals and medical students on every account
- In-house software and AI engineers building every system
- Clinic owners speak to us as peers, not vendors

Beyond the agency

I am also a certified **NLP practitioner (American Board)** and **CPD-accredited (UK)** coach in mind-body wellness and performance. It isn't the focus of this thesis, but it shapes how we build: understanding how people decide, what creates trust and what triggers fear goes into every patient script and system we design.

THE VISION

The leading medical agency in the region, *run by medical professionals.*

BY END OF 2026

- Agency registration completed in the UAE by end of November
- 3–5 clinic clients onboarded before the year ends
- Patient-Leak Audits of clinics in the UAE and Saudi Arabia begin

THROUGH 2027 · UAE & SAUDI ARABIA

- Build a strong base of dermatology, aesthetic and cosmetic dental clinic clients
- Gain deep, measured experience across the healthcare patient journey
- Launch the International Patient Desk to serve the UAE's growing medical tourism

MID-2027 ONWARD

- Extend to other countries in the GCC and beyond
- Partnerships with clinic groups and healthcare operators
- An annual Clinic Front-Door Report

What I'm asking from FCI

Support needed from November 2026 onward

- **Access:** introductions to clinic owners, healthcare groups and healthtech founders
- **Placement:** FCI events and delegations, including Riyadh and Qatar
- **Strategic guidance:** scaling and market entry
- **Visibility:** speaking at FCI events
- **Investment**, where it fits, for the International Patient Desk

What I bring to FCI

- A doctor-founder in one of the region's fastest-growing sectors, building compliance-first
- A co-branded **FCI Clinic Front-Door Report**: original healthcare insight for members and events
- A bridge for FCI healthtech founders who need clinic partners, pilot sites and medical input

We're building the medical agency that helps clinics and doctors earn patients' trust and keep it at every step, so no patient is lost after the first message.
