CLINIC GROWTH PROPOSAL

DOCTOR-LED CLINIC GROWTH. BRANDING + SYSTEMS.

We help private clinics turn attention into booked patients, with doctor-led branding and automated patient systems, built and run together.

WHO WE ARE

MEDICINE + ENGINEERING

The agency is led by **Dr. Azka Muzammil Qazi**, a medical doctor. We are building our agency with medical professionals and our own team of software and AI engineers.

Healthcare insight and engineering sit in the same team, so every system we build is designed around how patients and clinics actually work.

We are **based in the UAE** and plan to expand to the USA soon. Our focus is clinic owners and doctors in private practice.

THE PROBLEM WE SOLVE

LEADS IN, PATIENTS OUT

Clinics spend on content and ads, then lose patients **after** the enquiry arrives. Patients compare replies, not credentials. The fastest helpful clinic usually wins.

Most patients research in the evening, after the front desk has gone home. A missed call, a next-day reply or a bare price is often enough to send them to the next clinic.

Most agencies stop at content. We cover the full patient journey: the post that gets noticed, the reply at 9 PM, the follow-up and the rebooking months later.

Content gets you the opportunity.
Your systems decide what happens to it.

WHAT WE DO

THREE SERVICES, BUILT TO WORK TOGETHER

1

Doctor personal branding

Each doctor positioned in one clear specialty lane, with scripts, hooks and content they can film in one session.

Patients book doctors they feel they know, not logos.

2

Clinic branding

A doctor-led clinic account: every specialist visible, one lane per doctor, consistent daily content.

One account, several reasons to book. Content stays if a doctor leaves.

3

Automated patient systems

Instant replies, missed-call text-back, booking-focused price replies, follow-ups and rebooking reminders.

Enquiries that already came in stop going cold.

THE AUTOMATED SYSTEMS WE BUILT

FIVE SYSTEMS. FIVE LEAKS CLOSED.

One system for each point where clinics most often lose patients. Each runs on its own, and the clinic team takes over when a person is needed.

✗ LEAK 01

A missed call. No text back.

✓ MISSED-CALL TEXT-BACK

A friendly text within 60 seconds.

Calls missed during busy hours or after closing get an automatic reply asking how the clinic can help, so the patient doesn't call the next clinic.

✗ LEAK 02

A 9 PM DM. A next-day reply.

✓ AFTER-HOURS INSTANT REPLY

An instant first reply, day or night.

Enquiries after closing are answered straight away. The team picks the conversation up in the morning.

✗ LEAK 03

"How much?" Just a price back.

✓ BOOKING-FOCUSED PRICE REPLY

A price range + one question + two times.

Price-only replies get compared. Helpful replies that offer appointment times get booked.

✗ LEAK 04

"I'll think about it." Silence.

✓ FOLLOW-UP SEQUENCE

Polite follow-ups, then stop.

DAY 3 · DAY 7 · DAY 21 · STOP

✗ LEAK 05

Treated once. Never contacted again.

✓ REBOOKING REMINDER

A reminder timed to the treatment.

Past patients are invited back at the right moment. The easiest new patient is one the clinic already treated.

> **These systems support the front desk; they don't replace it. Every message is written in the clinic's own voice and approved before it goes live.**

HOW A CLINIC GETS STARTED

EVIDENCE FIRST, NOT A SALES PITCH

STEP 01

Patient-Leak Audit

Complimentary. We test the clinic like a patient: a 9 PM DM, a price question, a missed call. A short written report follows.

STEP 02

15-minute review call

We walk through the findings and agree which leaks matter most.

STEP 03

60-day pilot

We set up the systems and branding the clinic needs, run them and review what changed.

STEP 04

Ongoing

Daily content, system upkeep and regular reviews for clinics that continue.

WORKING ALONGSIDE OTHER PROVIDERS

WE FIT NEXT TO WHAT CLINICS ALREADY USE

Many clinics already work with an agency, consultant, software provider or advisor. Our work complements theirs rather than competing with it.

Agencies & content teams

They bring the attention. Our systems make sure the enquiries they generate get answered and booked.

Consultants & advisors

They can offer their clinic clients the audit as a practical, low-risk first step.

Healthcare & tech providers

They can pair their tools with our reply scripts and follow-up flows.

The clinic stays the client of whoever brought them. We report results openly, so everyone sees what the work delivers.

OUR STANDARDS

- **Doctor-led.** Built by a medical doctor who understands how patients decide and how clinics run.
- **Honest numbers.** Real results only. No guaranteed outcomes, no invented statistics.
- **Patient privacy first.** No real patient data in content; messages follow the clinic's own policies.
- **Compliance-aware.** Planned with UAE and US healthcare advertising rules in mind, and checked with the clinic before going live.

NEXT STEP: ONE COMPLIMENTARY AUDIT.

It takes us a few days, costs the clinic nothing, and shows exactly where patients are being lost.
